

5. Use the Porter Stemmer algorithm to perform word stemming on a list of words using python libraries.

8]
· Os

```
▶ from nltk.stem import PorterStemmer

ps = PorterStemmer()

words = ["running", "jumps", "easily", "fairly"]

stemmed_words = [ps.stem(word) for word in words]

print("Original words:", words)
print("Stemmed words:", stemmed_words)
```

✓

```
... Original words: ['running', 'jumps', 'easily', 'fairly']
Stemmed words: ['run', 'jump', 'easili', 'fairli']
```
